

# Research for theme-related funds

Author: Administrator User<info@frifugl.no>

Risk assessment analysis for particular sustainable development themes (i.e. water and clean technologies). In order to assist fund/hedge fund managers and private equity firms with the development of theme-related funds, we have developed a research service, which includes the identification of the main extra-financial risks and opportunities for that theme as well as a selection of companies to be included in the portfolio.
