

SPIDER Project

Author: Administrator User<info@frifugl.no>

With the co-funding of the Foundation Franco-Norvegienne, and IDEAM, the InSpire Foundation was the initiator and seed funder of the **SPIDER** project (Sustainable project Indicator and Evaluation Research), which has explored the use of advanced data search tools to identify and capture intangible values. This project has resulted in a practical tool, still called SPIDER, for identifying “hidden” information of relevance for the financial analysis of firms’ true environmental, social and economic performance.
